

Prashant Walunj

DevOps Engineer

prashantwalunj@outlook.com • 7304373999
Pune, India

Experienced DevOps engineer with hands-on experience in Azure DevOps, Docker, Kubernetes, AKS, AWS DevOps, Azure and AWS Cloud, Jenkins, Terraform, Helm. Proficient in optimizing CI/CD pipelines, automating processes, and ensuring robust and scalable software deployments. Dedicated to staying updated with the latest DevOps trends and fostering collaborative teamwork for efficient and agile project delivery.

Key Skills

- Azure DevOps
- Terraform
- Jenkins
- Agile Methodologies
- Docker
- Terraform Cloud
- AWS Cloud
- AKS
- Kubernetes
- Helm
- Linux Administration
- ECS

Professional Experience

Sapience Analytics Pvt Ltd May 2024 — Present
DevOps Consultant

- **IaC Management:** Managed infrastructure with **Terraform** and **Terraform Cloud**, ensuring consistent deployment across seven AKS environments (Dev, QA, QA2, Prep, Demo, UAT, Prod), reducing manual intervention by 30%.
- **Environment Oversight:** Maintained seven environments on **Azure AKS**, ensuring reliability and security, achieving 99.99% uptime for production systems.
- **Cost Optimization:** Optimized **Azure Cloud** expenses, reducing costs by 20% while maximizing resource utilization across all environments.
- **Automation for GCC:** Developed automated workflows for **GCC**, improving operational efficiency by 25% and reducing manual tasks.
- **Developer Support:** Provided ongoing support to developers, resolving deployment issues and reducing downtime by 40%.
- **PoC Initiatives:** Led PoCs on **code signing**, **Terraform modules**, and **patching automation**, implementing new technologies to improve deployment and security.
- **CI/CD Management:** Streamlined **CI/CD pipelines** in **Azure DevOps**, ensuring error-free deployments and faster development cycles.
- **Collaboration & Documentation:** Coordinated with teams to document best practices, promoting knowledge sharing and standardization.

Siemens Digital Industries and Software ltd, Pune June 2021 — November 2023
Software Engineer

InterOperability Startup

1.OpCenter Connect MOM

- Created build pipeline in Azure DevOps for .NET Framework-based projects with integrated SonarQube for code quality analysis, and a relase pipeline for WiX-based .exe applications with silent installation.
- Created a Python script to automate the extraction of performance data from CTT test logs and a SQL database, simplifying the generation of comprehensive Excel reports, resulting in time savings for the team.
- Created a Powershell-based prerequisite tool to install all the prerequisites needed to install product.

- Utilized Ansible for project automation, streamlining the installation process and ensuring efficient deployment of our product.
- Developed a robust build pipeline for a .NET-based project using Docker, optimizing the software development lifecycle.
- Orchestrated containerized applications on Kubernetes, ensuring scalability and high availability.
- Implemented Helm charts to simplify application deployment, resulting in a streamlined and repeatable process.

2. Close Loop Manufacturing MOM

- Developed a Gradle-based build pipeline in Azure DevOps, seamlessly integrating SonarQube for code quality analysis.
- Designed and implemented a comprehensive deployment pipeline for Deploying build, running Dev Tests, QA Tests. Utilized Powershell, Shell script, and Python script to automate the testing process and generate detailed reports.
- Automated performance testing procedures using a Python script, ensuring consistency and repeatability. Integrated Sumo Logic for real-time monitoring and reporting.
- Created Python-based tool for creating Release Packages.

3. Connect Electronics MOM

- Established a Build pipeline for Maven-based builds, incorporating SonarQube seamlessly within the pipeline for code quality analysis.
- Worked on a containerization of a build process.

Connecticus Technology Pvt Ltd, Pune
Software Trainee engineer

October 2020 — May 2021

BuildBooster

- Managed the successful migration of a project from Google Cloud (GCP) to Amazon Cloud (AWS), demonstrating proficiency in cloud platforms.
- Spearheaded the creation of development (Dev), staging (Stage), demonstration (Demo), and production environments on AWS.
- Administered AWS cloud resources, optimizing resource utilization.
- Orchestrated Jenkins-based build and deployment pipelines for Java microservices.
- Successfully transitioned the project's architecture to Docker-based images, improving scalability and resource utilization.
- Established AWS DevOps pipelines with ECS service for containerization. Contributed to a PoC exploring ECS and EKS services for infrastructure scalability.
- Utilized Terraform to orchestrate the creation of essential infrastructure components including EC2 instances, VPCs, and ECS services.
- Worked with Amazon S3, Amazon RDS, and Amazon Elasticsearch to integrate these services into the project.
- Managed Linux server administration, ensuring stability, security, and effective issue resolution while maintaining AWS resources.
- Collaborated closely with development teams to streamline the build and deployment processes, ensuring higher quality and efficient project delivery.

Education

Btech - Computer Science and Engineering
MIT Academy of Engineering, Pune

High School Certificate (HSC)
NMV Junior Collage, Pune

Secondary School Certificate (SSC)
Dnyanganga Vidyanketan Manchi Hill, Sangamner, Pune

Certifications

HashiCorp Certified: Terraform Associate (003), HashiCorp, February 2024 — February 2026

Professional Scrum Master® I (PSM I), Scrum.org, February 2023 — Present

Microsoft Certified: DevOps Engineer Expert, Microsoft, April 2024 — April 2026

Microsoft Certified: Azure Solutions Architect Expert, Microsoft, September 2020 — September 2022

Microsoft Certified: Azure Administrator Associate, Microsoft, July 2020 — July 2022

Microsoft Certified: Azure Fundamentals, Microsoft, May 2020 — May 2022
